

# 1<sup>st</sup> HBP Student Conference: Transdisciplinary Research Linking Neuroscience, Brain Medicine and Computer Science

Vienna, Austria, 8-10 February 2017

[education.humanbrainproject.eu/web/studentconference](http://education.humanbrainproject.eu/web/studentconference)

## Description

In the context of the 1<sup>st</sup> HBP Student Conference, young researchers from the fields of neuroscience, brain medicine and computer science receive the possibility to exchange ideas and perspectives and discuss various aspects of their particular fields of expertise relevant to the Human Brain Project. The conference offers a variety of discussion sessions, lectures and social events. Through working across boundaries and linking the various fields, it serves as a platform for both intra- and interdisciplinary exchange and is a great opportunity for extensive scientific discussions among peers and faculty, and also a fertile soil for new, innovative ideas.

## Conference Structure

- Keynote Lectures
- Discussion Sessions
- Student Lightning Talks
- Poster Presentations
- Round Table Discussion
- Social Event

We are looking for original high-quality submissions containing innovative research from all fields relating to the HBP research programme. Contributions emphasising theoretical and empirical foundations are just as welcome as new approaches to specific questions concerning the twelve subprojects of the HBP. Finally, we particularly encourage submissions introducing new and relevant problems, concepts and ideas with the potential to inspire the research community – even if the approach is at an early stage of development.

All participants may submit an extended abstract and will have the opportunity to present their work. Presentations will include a brief oral presentation, a poster, or both.

Abstracts to be submitted before 7 October 2016.

The conference will start on Wednesday, 8 February 2017 in the early afternoon with registration and end the afternoon of Friday, 10 February 2017.

## Scientific Committee

Nikola Simidjievski, chair | JSI

Andrea Santuy | UPM

Miriam Menzel | FZ JUELICH

Jovan Tanevski | JSI

Vitali Karasenko | UHEI

Tara Mahfoud | KCL

## Organised by

HBP Education Programme Office

## Upcoming Deadlines

Abstract submission: 7 October 2016

Online registration closes: 23 January 2017

## The Venue

The conference will take place at the Campus of the University of Vienna. It is a place of work for students and researchers, a place for the exchange of knowledge, and in its function as congress venue also serves as an important meeting point for students and researchers from all over the world.

Vienna is the capital and largest city of Austria, located in the northeast of the country on the banks of the Danube River. As Austria's cultural, economic and political centre, the city unites the royal-imperial flair of the past with the latest trends. There are excellent museums, art collections, numerous theatres and operas. Vienna is also famous for its coffeehouses and cuisine.

## Keynote Lectures

Christine Aicardi | KCL

Anna Letizia Allegra | UFI

Gaute Einevoll | NMBU

Dragi Kocev | JSI

Kai Kummer | MUI

Mihai Petrovici | UHEI

Florian Röhrbein | TUM

## Keywords
